DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art shows an extension pole telescoping inner and outer sections with a locking mechanism to fix the section at a relative position (Polzin et al). The prior art further show the locking mechanism to include a tubular collet cam with a body section and a pair of locking segments along with a chuck (Polzin et al). The prior art fails to show all of the claimed elements further where the locking segments are separated by an axial margin from each other and are separated from the body by a circumferential slot, such that the segments are attached to the body by a connection portion and cantilevered from the connection portion in a circumferential direction.

Additionally, the prior art does not show an outward surface of the segments to present a radial outer dimension that progressively increases in a circumferential direction defined within a perpendicular cross-section relative to the axis or for the chuck to include inward facing surfaces having a radial dimension the progressively increases in the circumferential direction.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Kyle whose telephone number is 571-272-7057. The examiner can normally be reached on Monday - Friday, 8:30 am - 5:00 pm.
